Professional Summary

Full Stack Developer specializing in C#, ASP.NET Core, React, and scalable backend systems. Experienced in developing RESTful APIs, real-time AI voice agents, and multi-exchange trading platforms, with expertise in Data Structures, OOP, Docker, and Kubernetes.

Experience

Sumati.IO

June 2025 – March 2026

Full Stack Developer

C# • .NET • ASP.NET Core • REST • React

- Developed and maintained **RESTful APIs using ASP.NET Core and C#** for client applications and scalable backend services.
- Designed and implemented **business logic, API validation, data models, and service-layer components** following OOP and modular architecture principles.
- Integrated **AI/LLM-based services** into web applications to support intelligent document processing and automated data extraction workflows.
- Worked with **SQL Server/MySQL databases**, developing queries and integrating database operations with ASP.NET Core backend services.
- Improved **API performance, reliability, and scalability** by optimizing backend logic, API workflows, and data-processing operations.
- Collaborated in an **Agile development environment** using Git/GitHub for version control, code reviews, debugging, and feature development.

Projects

AI Voice Agent

Python • FastAPI • WebSocket • LLM • STT/TTS

- Built a real-time AI voice server using Python, FastAPI, and WebSockets for low-latency, bidirectional audio communication.
- Integrated STT, LLM-based response generation, and TTS into an end-to-end pipeline enabling automated real-time voice conversations.
- Implemented session management, API integrations, business-rule validation, and structured tag extraction for automated workflows.

Multi-Exchange Fix Protocol

C# • .NET • FIX Protocol

- Built a multi-exchange FIX API client for real-time order execution, trade management, and market data.
- Developed strongly-typed request/response models and optimized FIX message handling for low-latency trading operations.
- Designed a modular architecture using interfaces and dependency injection for scalable exchange integrations.

Education

Shri Ram Institute of Technology, Jabalpur
B.Tech in Computer Science

Sep 2021 – May 2025
CGPA: 8.14/10

Technical Skills

Programming: C#, Java, Python, SQL

Frontend: React, Angular, HTML5, CSS

Backend: ASP.NET, ASP.NET Core, REST APIs, FastAPI

AI/Real-Time: LLM, Speech-to-Text, Text-to-Speech, WebSocket

Databases: MySQL, SQL Server

DevOps/Tools: Git, GitHub, Postman, Visual Studio, VS Code, Docker, Kubernetes

Extracurricular

DEEP BLUE

Mastek – March 2025

- Participated in a **National-level Hackathon** focused on web development and AI-based solutions.
- Developed a web-based solution using **Python and YOLO** for real-time object detection and automated image analysis.
